It's Easy Being Green!

Oregon Interfaith Power & Light (OIPL) and the Bonneville Environmental Foundation (BEF) are partnering to offer you Green Tags.

Purchasing Green Tags to offset the negative impacts of your electricity use is an easy, inexpensive way to demonstrate your commitment to protecting the planet.

What are Green Tags?

Green Tags represent the environmental benefits like clean air and clear skies from new, renewable energy sources (or "green" power). These positive environmental impacts make these sources more valuable than traditional power plants (or "brown" power). While most electricity generation relies on burning fossil fuels or using nuclear power, Green Tags are generated by producing electricity using new wind, solar and other renewable energy sources.

What does your purchase do?

Your dollars help to replace fossil fuel burning electricity generation. Green power is more expensive than traditional, brown power. When you buy Green Tags from BEF, your dollars pay for the extra costs of building and operating new renewable energy projects instead of non-renewable power plants. These renewable projects are friendly to the environment, and reduce emissions of carbon dioxide and other greenhouse gases.
