

Prayers from the Interfaith Climate Vigil on June 28th, 2009

These prayers of hope and concern for creation were written down by participants during the service.

- *I pray for trees of green and skies of blue for generations to come.*
- *Pray that all people will be moved by God's Spirit to heal our world and begin or renew their efforts to live in a sustainable manner.*
- *Creator God – Hear and bless thy beasts and singing birds and award with tenderness small things that have no words.*
- *May we find ways to convince our brothers and sister congregants, our neighbors, our leaders, our friends, and ourselves of the urgency to act now to turn the tide of global warming.*
- *Glory to the Climate
Glory to the Weather
Glory to the Oceans
The Planet Speaks
Restore the Glory.*
- *I pray for a deep change of heart - and actions – concerning how we tread on the earth. I envision lives radically different and happier, than we currently have.*
- *May the light of thought be enlightened by God's Will.*
- *May we each sense the sacred beauty of our world. May we honor it. May we call for it.*
- *My prayer is that angels will partner with us in saving this planet – they are the unseen creations who exist to help us all – we do have their assistance if we ask for it.*
- *May love fill us, hold us, and carry us through the doubt and strife of a changing global mind.*
- *I pray we will re-establish our reverence and sense of deep connectedness to the world and life that sustains us, knowing truly that our health, happiness, harmony as interdependent with the planet – that we may also find within us the courage to act **BOLDLY** to address global warming.*
- *We pray for divine or anyone else's intervention save simply your birds and honey bees for their small but indispensable effect on our lives.*

- *Prayers and Hope for a global awakening regarding the urgency of a new stewardship to salvage a livable planet for the future.*
- *Prayer and Vision: that self-centeredness, indifference, denial, and greed will diminish to the point that the majority of mankind will respectfully join together in taking care of our planet.*
- *That we may
learn to love
the earth and her children
each day*
- *I pray that God's light will shine on us. I also pray for all the poor and the hungry and sick and I hope God's light and faith shine on them and give them faith. My name is Mary Brocker age 11 adopted 2002 from Sierra Leone West Africa.*
- *I pray that God will move many hearts in our communities of faith to care for creation.*
- *Help us give thanks for
this group and their
efforts. May I be able to do the same in my faith walk and in the world of stone and matter, office buildings and in the public square. Amen*
- *Renewal*
- *That I may find my place in the needy world physically and spiritually*
- *With gratitude, my hope is
that school children
will live with courage
and not let fear
prevent their ambitions
to live in contact with
the natural systems that
sustain an abundance of
species.*
- *May we all learn to Listen to
the other beings and act on what they
are telling us.*

May all of our actions take Earth's well-being into consideration.

*May we say to Mother Earth and
All her beings*

“You and we are one.”

-Frodo

- *May the day be near when all our
decisions are primarily driven by ecological and social justice ethics.*
- *I pray that we might become
More curious about what makes
The world the wonder that it
is and to find our place within
that wonder, so that we might
regain a sense of reverence
and a sense of awe. I
pray that we might look around
and enjoy the creation more
and consciously walk more
gently upon our fragile planet.*
- *I wish for:*

*A world where all life is valued equally –
Woman/man = butterfly*

-Marie Carver

- *Dear Everlasting God,
Help us to realize that we are
All brothers and sisters.
And that we are all one with every
Living thing on the earth and the
Earth itself!*
- *My prayer is that all faith
communities will give voice to
the sacredness of Earth and
communicate the moral urgency
of climate change.*
- *I pray that we
begin to remember
the impact of our
actions on future*

generations.

- *I pray for climate refugee's
In sub-saharan Africa*
- *May the intelligence of man
be brought to bear on making
our existence part of the
whole.*
- *God bless the earth
And all its life.*
